Contents

Preface **xi**

1 Introduction **1**
1.1 Two Breakthroughs . . . 2
1.2 Knowledge . . . 3
1.3 A Crude Picture of the Mind . . . 4
1.4 Core Knowledge . . . 5
1.5 Two Stories . . . 7
1.6 Development Is Rediscovery . . . 8

I Physical Objects **11**

2 Principles of Object Perception **13**
2.1 Knowledge of Objects Involves Three Abilities . . . 13
2.2 Segmentation . . . 15
2.3 Principles of Object Perception . . . 20
2.4 Conclusion . . . 23

3 The Simple View **25**
3.1 The Simple View . . . 25
3.2 Persistence . . . 27
3.3 Extending the Simple View to Persistence . . . 32
3.4 Causal Interactions . . . 34
3.5 The Case for the Simple View . . . 36

4 The Linking Problem **41**
4.1 Against the Simple View . . . 42
4.2 Further Evidence Against the Simple View . . . 46
4.3 Things Get Even Worse for the Simple View . . . 48
4.4 The Linking Problem . . . 50
4.5 Representation Not Knowledge . . . 51
4.6 Graded Representations? . . . 53

4.7 Conclusion 55

5 Core Knowledge **57**
5.1 What Is Core Knowledge? 58
5.2 Can Core Knowledge Solve the Linking Problem? 60
5.3 How Not to Define Something 62
5.4 Will Invoking Modularity Help? 63
5.5 Conclusion 64

6 Object Indexes and Motor Representations of Objects **67**
6.1 Object Indexes in Adult Humans 68
6.2 Object Indexes and the Principles of Object Perception . . . 70
6.3 The CLSTX Conjecture 74
6.4 Signature Limits 75
6.5 Knowledge or Core Knowledge or ...? 79
6.6 Against the CLSTX Conjecture 80
6.7 Motor Representations of Objects 81
6.8 Conjecture O 83
6.9 Conclusion: Paradox Lost 86

7 Metacognitive Feelings **89**
7.1 Objection to Conjecture O 89
7.2 Metacognitive Feelings: A First Example 91
7.3 More Metacognitive Feelings 92
7.4 What Is a Metacognitive Feeling? 94
7.5 A Metacognitive Feeling of Surprise? 96
7.6 Conjecture O^m 97
7.7 Metacognitive Feelings are Intentional Isolators 99
7.8 Conclusion 101

8 Conclusion to Part I **103**
8.1 What Is an Expectation? 103
8.2 Core Knowledge: A Lighter Account 105
8.3 Development Is Rediscovery 106
8.4 How Does Rediscovery Occur? 108

9 Innateness **113**
9.1 Syntax 114
9.2 A Poverty of Stimulus Argument 115
9.3 The Poverty of Poverty of Stimulus Arguments 118
9.4 Is Core Knowledge Innate? 119
9.5 Syntax and Rediscovery 120
9.6 Conclusion 122

Interlude on Innateness **113**

II Minds and Actions **125**

10 Action **127**
10.1 Tracking vs Knowing . . . 127
10.2 Three-month-olds Track the Goals of Actions . . . 128
10.3 Pure Goal Tracking . . . 131
10.4 The Teleological Stance . . . 134
10.5 Statistical Regularities . . . 137
10.6 A Methodological Explanation? . . . 141
10.7 A Second Puzzle: Acting and Tracking . . . 142
10.8 Conclusion . . . 145

11 A Theory of Goal Tracking **147**
11.1 The Simple View . . . 147
11.2 The Motor Theory of Goal Tracking . . . 148
11.3 The Motor Theory and the Teleological Stance . . . 151
11.4 Target vs Goal . . . 153
11.5 A Dual Process Theory of Goal Tracking . . . 155
11.6 Puzzles Solved? . . . 157
11.7 Conclusion . . . 158

12 Mind: the Puzzle **161**
12.1 All About Maxi . . . 162
12.2 Infants track false beliefs . . . 166
12.3 A Replication Challenge . . . 169
12.4 Methodological Defects or Truly Contradictory Responses? . . . 170
12.5 Models . . . 173
12.6 The Mindreading Puzzle . . . 175

13 Three Levels of Analysis **177**
13.1 Tracking Beliefs without Representing Them? . . . 177
13.2 Altercentric Interference . . . 178
13.3 Mirroring beliefs? . . . 180
13.4 Three Levels of Analysis . . . 182
13.5 Task Analysis . . . 184
13.6 Selection and Inhibition . . . 187
13.7 Too Much Mindreading? . . . 192
13.8 What Now? . . . 197

14 Mind: a Solution? 199
14.1 Mindreading Is Sometimes Automatic 200
14.2 Mindreading Is Not Always Automatic 201
14.3 A Dual Process Theory of Mindreading 202
14.4 Speed–Accuracy Trade-Offs 204
14.5 What Is a Model of Minds and Actions? 205
14.6 Minimal Models of the Mental 207
14.7 Signature Limits in Mindreading 210
14.8 A Developmental Theory of Mindreading 213
14.9 How to Solve the Mindreading Puzzle 216
14.10 Task Analysis Revisited 218
14.11 Is There Core Knowledge of Minds? 219
14.12 Origins of Knowledge of Mind: Rediscovery 219

15 Joint Action 223
15.1 Joint Action vs Parallel but Merely Individual Actions 224
15.2 Shared Intention 226
15.3 Bratman on Shared Intention 227
15.4 An Inconsistent Triad 228
15.5 Coordinating Planning 231
15.6 Joint Action in the First Years of Life 235
15.7 Collective Goals vs Shared Intentions 239
15.8 Expectations about Collective Goals 242
15.9 Conclusion 245

16 Conclusion to Part II 249
16.1 Dual Process Theories 250
16.2 Pluralism about Models 251
16.3 Goal Tracking Is the Foundation 252
16.4 When Joint Action Enables Goal Tracking 253
16.5 Joint Action and the Developmental Emergence of Knowledge 255

Conclusion 259

17 Conclusion 259
17.1 Infants Rely on Minimal Models 260
17.2 ... As Do Adults, Sometimes 261
17.3 Puzzles Matter 262
17.4 Linking Problems Abound 263
17.5 Core Knowledge Isn't What You Think It Is 264
17.6 How to Solve Linking Problems 265
17.7 Representation: Handle with Care 266

17.8 Inferential and Intentional Isolation 267
17.9 Rediscovery Is Joint Action 268

Glossary **271**
